(54) INFORMATION PROCESSING SYSTEM, PORTABLE TERMINAL, SERVER AND DATA PROCESSING METHOD

(57)Abstract:

PROBLEM TO BE SOLVED: To handle massive information without limiting the capacity of storage memory provided at a portable terminal by providing the portable terminal with the memory for temporarily storing still picture information as digital data, and providing a server with a storage means for storing the digital data received from the portable terminal.

SOLUTION: Still picture information is preserved through a camera input means 34 into a RAM 33 as digital still picture data. A CPU 31 automatically or manually receives an input command from an input means 37, a telephone call is made to an access point by a radio communication processing part 36, and a portable terminal 10 and the server form a physical communication network. The CPU 31 transfers the still picture data to the server. When there is the storage capacity of RAM 33 for two pieces of still picture data, each time one piece of data is photographed, the next still picture can be photographed while transferring the photographed still picture data to the server. The server stores the received still picture data in its storage means.

BEST AVAILABLE IMAGES

Defective images within this document are accurate representations of the original documents submitted by the applicant.

Defects in the images include but are not limited to the items checked:

- BLACK BORDERS**
- IMAGE CUT OFF AT TOP, BOTTOM OR SIDES**
- FADED TEXT OR DRAWING**
- BLURRED OR ILLEGIBLE TEXT OR DRAWING**
- SKEWED/SLANTED IMAGES**
- COLOR OR BLACK AND WHITE PHOTOGRAPHS**
- GRAY SCALE DOCUMENTS**
- LINES OR MARKS ON ORIGINAL DOCUMENT**
- REFERENCE(S) OR EXHIBIT(S) SUBMITTED ARE POOR QUALITY**
- OTHER: Small Text**

IMAGES ARE BEST AVAILABLE COPY.

As rescanning these documents will not correct the image problems checked, please do not report these problems to the IFW Image Problem Mailbox.
